

PRINCE CHIMAOBIM NWABUIKWU

SENIOR TECHNICAL SUPPORT & INFRASTRUCTURE ENGINEER

Remote | Port Harcourt, Rivers, Nigeria • +234 805 222 4202 • princechimaobimworkplace@gmail.com
GitHub: github.com/princechimaobim • LinkedIn: linkedin.com/in/princechimaobim

PROFESSIONAL SUMMARY

Highly accomplished Technical Support Specialist, System/Network Engineer, and Cloud Architect with over 10 years of professional IT experience managing complex technological infrastructures, cloud deployments, and high-volume help desk operations. Proven capability to design, optimize, and secure cloud environments (AWS, Azure, GCP) while resolving critical Tier 1 to Tier 3 infrastructure, network, and application layer impediments. Expert in implementing ITIL-driven ticket management workflows, establishing detailed operational documentation, and driving automated CI/CD and Configuration pipelines. Combines rich technical capabilities with certified Agile Scrum leadership to empower cross-functional support desks, reduce operational cost, and maintain peak client satisfaction metrics.

TECHNICAL CORE COMPETENCIES

- | | |
|--|---|
| • Technical Support & Operations: | ITIL Framework, Advanced Technical Troubleshooting (Tier 1-3), SLA Compliance, CRM & Help Desk Architecture, Knowledge Base Documentation, Incident & Escalation Management |
| • Cloud Architecture & Platforms: | AWS (EC2, S3, RDS, Lambda, VPC, IAM, CloudWatch), Microsoft Azure (VMs, Storage, SQL, AD), Google Cloud Platform (GCE, Cloud SQL, Stackdriver), IBM Cloud |
| • Networking & Infrastructure Security: | VPC Architecture, Subnetting, Security Groups, Network ACLs, Route 53, VPN Gateways, SSL/TLS Certificates, Next-Gen Firewalls, Modems, Switches, Hubs, Routers |
| • DevOps, IaC & Containerization: | Infrastructure as Code (Terraform, CloudFormation, Ansible), Docker, Kubernetes, Jenkins, Git/GitHub, GitLab CI/CD, AWS CodePipeline, Scripting (Python, PowerShell) |
| • Database & Big Data Systems: | Amazon RDS, Azure SQL, Google Cloud SQL, Amazon DynamoDB, NoSQL, SQL Server, Database Management Essentials, ETL Processes (AWS Glue, Azure Data Factory) |
| • Agile Operations & Atlassian Admin: | Certified Scrum Master (CSM), Advanced Jira/Confluence Administration, Workflow Customization, Atlassian Toolchain |

Implementation, Metrics Tracking (Velocity,
Lead Time)

PROFESSIONAL EXPERIENCE

Senior Technical Support & Infrastructure Consultant (Remote) | Upwork & Guru.com
(Global) **Dec 2021 – Present**

- **Infrastructure Troubleshooting:** Diagnose and rectify complex Tier-2 and Tier-3 cloud infrastructure, data access, and software integration constraints for a diversified global client base.
- **Cloud Deployment Management:** Formulate cloud computing strategies; design, implement, and optimize highly secure and reliable AWS/Azure architectures that strictly align with global data security compliance mandates.
- **Atlassian Toolchain Administration:** Gather extensive business process criteria to configure, optimize, and customize JIRA and Confluence workflows, custom fields, dashboards, and automated access protocols.
- **Incident Mitigation Frameworks:** Develop, test, and implement disaster recovery paradigms and comprehensive business continuity templates for cloud-native configurations to ensure high infrastructure availability.
- **Agile Operations Integration:** Organize and facilitate structural Agile processes (Sprint Planning, Daily Scrums, Retrospectives) to optimize client project delivery cycles while tracking metrics including team velocity and cycle time.

Systems Support Lead & Certified Scrum Master | GBC Murphy Inc. (Port Harcourt, Nigeria)
Dec 2017 – Nov 2021

- **Systems Improvement Execution:** Audited internal product development processes to isolate system bottlenecks, driving procedural changes that accelerated workspace productivity by implementing high-availability standards.
- **Infrastructure Maintenance Control:** Executed extensive network and system performance benchmarking; monitored resource utilization, capacity limits, and system health to preemptively avoid technical service degradations.
- **Impediment Isolation Management:** Acted as primary escalation point for cross-functional technical teams, identifying and removing architectural blockers, bugs, and configuration inconsistencies.
- **Support Workspace Optimization:** Coordinated support capacity tracking using Advanced Estimation Poker matrixes, stabilizing team performance metrics and maintaining transparent status updates across corporate operational lines.

Infrastructure & Web Support Specialist | Global Alliance for Universal Health Coverage in Africa (Abuja, Nigeria) **Mar 2016 – Nov 2017**

- **Web Infrastructure Architecture:** Planned, prototyped, and orchestrated architectural components for robust enterprise web applications, writing optimized PHP and JavaScript code blocks.

- **Cross-Platform API Integrations:** Architected, documented, and stress-tested customized Application Program Interfaces (APIs) to ensure seamless, secure data exchange between external systems and internal relational databases.
- **Environment Optimization Testing:** Conducted rigorous cross-browser performance tracking and automated environment testing to troubleshoot operational logic gaps and fix code defects prior to production release.
- **User Onboarding Orchestration:** Served as primary technical anchor for major customer accounts, overseeing systems onboarding, tracking KPIs, and establishing technical documentation to clear user adoption hurdles.

Systems & Network Support Engineer | Circum Technologies Limited (Port Harcourt, Nigeria)

June 2010 – Jan 2016

- **Network Configuration Operations:** Configured, deployed, and supported various enterprise-grade networking assets including managed switches, firewalls, routers, load balancers, and dedicated VPN tunnels.
- **Tier-2/3 Network Engineering:** Provided advanced technical support, rectifying server errors, subnetting faults, and physical hardware issues to maintain baseline client uptime parameters.
- **System Software Maintenance:** Administered system-wide upgrades, hotfixes, patches, security configurations, and major service packs within established enterprise change management guidelines.
- **Client Hardware Provisioning:** Designed and deployed customized physical hardware and software specifications according to individual client request frameworks.

Administrative & Logistics IT Officer | The Hillside School (Abuja, Nigeria) **Jan 2014 – Mar 2015**

- **Database Infrastructure Control:** Built, updated, and secured internal employee databases while identifying processing vulnerabilities and staff deployment gaps.
- **Hardware Operations Auditing:** Supervised third-party vendor maintenance technicians to rapidly fix enterprise network equipment and structural building systems.
- **Information Infrastructure Control:** Managed records access privileges following state and local regulatory privacy legislation framework guidelines.

EDUCATION & PROFESSIONAL CREDENTIALS

Bachelor of Science (B.Sc.) in Accounting | University of Nigeria Nsukka (UNN) 1999 – 2005

Post-Graduate Diploma in Computer Network Engineering | Allenworld Creation Inc. Training School 2006

Advanced Diploma in Telecom Engineering (GSM/WCDMA/Core Network/SS7) | Corner Stone Technology 2011

PROFESSIONAL CERTIFICATIONS

- **Google Cybersecurity Professional Certification** — Issued by Google via Credly (2023) • [Verification Link](#)
- **AWS Infrastructure Architecture Course Completion** — Issued by Amazon Web Services via Credly (2023) • [Verification Link](#)

- **Certified Scrum Master (CSM)** — Issued by Volkerdon (2022) • *Verification Link*
- **Database Management Essentials** — Issued by Coursera / University System (2017) • *Verification Link*
- **Teaching English as a Foreign Language (TEFL) Professional** — Issued by TeacherRecord (2022) • *Verification Link*
- **Digital Marketing Masterclass** — Issued by IIDE (2004) • *Verification Link*
- **Health & Safety for Social and Health Environments** — Issued by Alison Certification (2022) • *Verification Link*
